

# THE POOL & SPA VAC

## SPA & POOL VAC

### ASSEMBLY INSTRUCTIONS/MONTAGE INSTRUCTIES

#### Main unit/Hoofverpakking:

- ① Handle/Handvat
- ② Lower Piston Rod/Onderste zuigstang
- ③ Upper Tube/Bovenste buis
- ④ Lower Tube/Onderste buis

#### Accessories/Accessoires:

- ⑤ Slide-On Brush/Opzefborstel
- ⑥ Wide Mouth Nozzle/Breed mondstuk
- ⑦ Dual End Nozzle/Weezijdig mondstuk
- ⑧ Skimmer (if included)/Skimmer (indien inclusief)
- ⑨ Wall Mount/Wandhouder

- ① Insert the Lower Piston Rod into the unit's Upper Tube. Slide the Rod through the tube until the bottom half juts out slightly.

Schuif de onderste zuigstang in de bovenste buis. Schuif de stang door de buis totdat deze er half uitsteekt.

- ② Take the Handle and attach it to the Upper Piston Rod by screwing it on clockwise.

Bevestig het handvat aan de bovenste zuigstang door deze met de klok mee er op te schroeven.

- ③ Gently position the bottom Lower Piston Rod into the gray opening of the Lower Tube.

Plaats de onderste zuigstang voorzichtig in de grijze opening van de onderste buis.

- ④ Slide Upper Tube gently until it meets with the Lower Tube. Join both Upper and Lower Tube together by turning Upper Tube clockwise.

Schuif de bovenste buis voorzichtig tegen de onderste buis aan. Bevestig de bovenste en onderste buis aan elkaar door de bovenste buis met de klok mee te draaien.

### USE AND CLEANING INSTRUCTIONS

The Pool & Spa Vac is made to simplify all your pool and spa cleaning tasks.

Cleaning is made easy, the simple pump action creates suction that draws in water and debris from the pool or spa as you pull the handle out.

Push the handle in and the dirt and debris become trapped inside the special filter basket as the water flows out.

This vacuum requires no hoses, batteries or special hook ups.

Your pool and spa vac comes complete with a specially designed Slide-on angled brush, a dual nozzle (bell and narrow, already attached to the vacuum), a wide end nozzle (attaches to the narrow end of the dual nozzle) and a wall mount bracket for storage.

### CLEANING YOUR POOL AND SPA

Always start by priming the unit by placing the nozzle end of the vacuum underneath the surface of the water. Pump the units handle in and out several times to remove any air that may be trapped in the vacuum. Always begin with the handle pushed completely in. pull the handle out to draw debris in.

### EMPTYING THE FILTER BASKET

- 1) Twist and pull filter unit to remove.
- 2) Grasp the plastic band at the base of the screen. DO NOT GRASP THE FILTER BASKET SCREEN! Gently rotate the filter unit towards you until you feel it stop.
- 3) Gently pull the filter basket to separate it from the main filter unit. Discard the contents, and rinse the filter.

CAUTION: DO NOT SCRAPE VACUUM OR NOZZLES AGAINST ACRYLIC SPAS AS THIS MAY DAMAGE THE SURFACE OF YOUR SPA.

IT IS RECOMMENDED THAT YOU ALWAYS DRAIN EXCESS WATER FROM THE UNIT AFTER USE.
